LIGHT ELECTRONICS CO., LTD.

Features

LIGHT

Pb free product—RoHS compliant IR light source with high efficiency Low thermal resistance Center of spectral emission at 850nm Radiant angle: 90°

Applications

InfraredIlluminationfor cameras Surveillance system Machine vision systems Eye tracking systems

SafetyAdvices

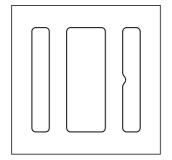

Depending on the mode of operation, these devices emit highly concentrated non visible infrared light which can be hazardous to the human eye. Products which incorporate these devices have to follow the safety precautions given in IEC 60825-1 and IEC 62471.

Package Dimension

Part NO.	Chip Material	Lens Color
SL-T3838IRC01A-L230	AlGaAs	WaterClear

Notes:

- 1. All dimensions are in millimeters.
- 2. Tolerance is ± 0.10 mm unless otherwise noted
- 3. Specifications are subject to change without notice.

LIGHT

Suggest IR Reflow Condition For Lead Free

- 1. Reflow soldering should not be done more than two times.
- 2. When soldering, do not put stress on the LEDs during heating.

Soldering iron

- 1. When hand soldering, the temperature of the iron must less than 350 for 5 seconds.
- 2. The hand solder should be done only once.

Repairing

Repair should not be done after the LEDs have been soldered. When repairing is unavoidable, a double-head soldering iron should be used (as below figure). It should be confirmed beforehand whether the characteristics of LEDs will or will not be damaged by repairing.
